\*The Board of the Authority was inaugurated on 12 May 2017 by the Federal Government of Nigeria.

**Nigeria Sovereign Investment Authority**  
 Unaudited consolidated and separate financial statements  
 For the 6 months period ended 30 June 2017

**Directors' report**

**1 Financial statements**

The directors of the Authority present their half year report on the affairs of Nigeria Sovereign Investment Authority ('the Authority' or 'NSIA'), together with the financial statements of the Authority and the subsidiaries (known as "the Group") and independent auditor's review report for the 6 months period ended 30 June 2017.

**2 Principal activities**

The Authority was established by the Nigeria Sovereign Investment Authority (Establishment etc.) Act, 2011 to manage excess funds from the country's sale of crude oil. This is performed through three (3) funds; Stabilisation Fund (SF), Nigeria Infrastructure Fund (NIF) and the Future Generation Fund (FGF). The Authority commenced operations in October 2012.

**3 Operating results**

The following is a summary of the Authority's operating results for the period:

	<b>Group</b>	<b>Authority</b>
	<b>30 June</b>	<b>30 June</b>
	<b>2017</b>	<b>2017</b>
	<b>N'000</b>	<b>N'000</b>
Investment and interest income	7,072,381	5,533,108
Net loss on financial assets	(3,801,788)	(3,801,788)
Net foreign exchange gains	9,843,543	9,853,543
Profit after tax	7,872,567	10,017,362
Total comprehensive income for the period	<u>11,797,104</u>	<u>13,594,413</u>

**4 Objective**

NSIA is an autonomous entity established under the laws of the Federal Republic of Nigeria with broad mandates to:

- a) enhance the development of Nigerian infrastructure
- b) provide stabilisation support in times of economic stress, and
- c) carry out such other activities as may be related to the above objects.

**5 Governance and management**

The Act establishes a Governing Council (the Council) for the Authority. The Council comprises the following:

- a) The President of Nigeria (who may be represented by the Vice-President);
- b) Governors of Nigeria's 36 States; and
- c) Eighteen other appointees, including:
  - (i) Attorney-General of the Federation;
  - (ii) Minister of Finance;
  - (iii) Minister in charge of the National Planning Commission.

**6 Employee health, safety and environment**

The Authority enforces strict health and safety rules and practices in the work environment, which are reviewed and tested regularly. The Authority provides medical insurance for its employees through designated hospitals and clinics. Fire prevention and fire-fighting equipment are installed at strategic locations within the Authority's premises.

**Nigeria Sovereign Investment Authority**  
**Unaudited consolidated and separate financial statements**  
**For the 6 months period ended 30 June 2017**

**Statement of directors' responsibilities**  
**In relation to the financial statements for the 6 months period ended 30 June 2017**

---

The Nigeria Sovereign Investment Authority Act requires the preparation of quarterly reports of the financial affairs of the Authority and Group at the end of the quarter and of its profit or loss. The responsibility include:

- a. ensuring that the Authority and Group keep proper accounting records that disclose, with reasonable accuracy, the financial position of the Authority and Group and comply with the requirements of the Nigeria Sovereign Investment Authority Act;
- b. designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatements, whether due to fraud or error; and
- c. preparing the Authority and Group's financial statements using suitable accounting policies supported by reasonable and prudent judgements and estimates that are consistently applied.

The directors accept responsibility for the quarterly financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgements and estimates, in conformity with International Financial Reporting Standards and the requirements of the Nigeria Sovereign Investment Authority Act.

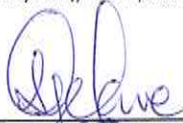

The directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Authority and Group and of its profit or loss. The directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the directors to indicate that the Authority will not remain a going concern for at least twelve months from the date of this statement.

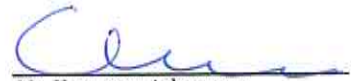

**Signed on behalf of the directors by:**

## REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION TO THE MEMBERS OF THE NIGERIA SOVEREIGN INVESTMENT AUTHORITY

### Introduction

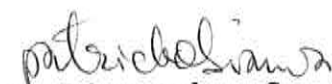

We have reviewed the accompanying consolidated and separate interim statement of financial position of Nigeria Sovereign Investment Authority ("the Authority") and its subsidiaries (together "the Group") as at 30 June 2017 and the related consolidated and separate statements of comprehensive income, changes in equity and cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes. The Directors are responsible for the preparation and fair presentation of these consolidated and separate interim financial information in accordance with the International Accounting Standard 34 "Interim financial reporting". Our responsibility is to express a conclusion on these consolidated and separate interim financial information based on our review.

### Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of interim financial information performed by the independent auditor of the entity." A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated and separate interim financial information do not give a true and fair view of the financial position of the Group and the Authority as at 30 June 2017, and of its financial performance and its cash flows for the six-month period then ended in accordance with International Financial Reporting Standard 34 "Interim financial reporting".

**Nigeria Sovereign Investment Authority**  
**Unaudited consolidated and separate financial statements**  
**For the 6 months period ended 30 June 2017**

**Notes to the financial statements**

**1 General Information**

Nigeria Sovereign Investment Authority ('NSIA' or 'the Authority') was established to receive, manage and invest the excess funds from the country's sale of crude oil in a diversified portfolio of medium and long-term investments. The Authority was setup by the Nigeria Sovereign Investment Authority Act, which was signed in May 2011 and was allocated an initial USD 1 billion in seed capital. The Authority commenced operations in October 2012.

The Authority is domiciled in Nigeria and its registered office address is the Clan Place, 4th floor, Plot 1386A, Tigris Crescent, Maitama, Abuja.

To actualise its mandate, the Authority has established three separate 'ring-fenced' funds. They include Stabilisation Fund (SF), Future Generations Fund (FGF) and Nigeria Infrastructure Fund (NIF). The investment activities of the funds are managed as follows:

Fund	Investment managers
Stabilisation Fund (SF)	UBS Global Asset Management Limited
Nigeria Infrastructure Fund (NIF)	In-house Management Team, Fund for Agricultural Finance in Nigeria (FAFIN)
Future Generations Fund (FGF)	Cevian Capital UK LLP, Blue Mountain Capital Management, JHL Capital Group LLP, Edgbaston Investment Partners, Capital Group, Arbitr Offshore Limited, Somerset Capital Management LLP, Marathon Asset Management LLP, Chieftain Capital, Prince Street, Jamison Capital Partners, Xenon Private Equity, Z Capital Partners, Helios Investment Partners, Healthcare Royalty Partners, AQR Capital Management, Actis Capital, and Africa Capital Alliance, Abraaj Growth Market Health Fund LP.

**2 Structure and content**

The financial statements comprise:

- (a) A statement of financial position at the end of the period;
- (b) A statement of comprehensive income for the period;
- (c) A statement of changes in equity for the period;
- (d) A statement of cash flows for the period;
- (e) Notes, comprising a summary of significant accounting policies and other explanatory information.

**3 Basis of preparation**

**3.1 Statement of compliance**

The consolidated and separate financial statements of Nigeria Sovereign Investment Authority (NSIA) have been prepared in accordance with International Financial Reporting Standards (IFRS) on Interim financial information (IAS 34), including International Accounting Standards and Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) applicable to companies reporting under IFRS. Further standards may be issued by the International Accounting Standards Board (IASB) and may be subject to the interpretations issued by the IFRIC.

**3.2 Basis of measurement**

The financial statements have been prepared on the historical cost basis except for the following:

- \* Available-for-sale financial assets are measured at fair value
- \* Fair value through profit or loss financial assets are measured at fair value
- \* Held to maturity financial assets and financial liabilities are measured at amortised cost.

**3.3 (a) Functional and presentation**

These financial statements are presented in Naira. All financial information presented in Naira has been rounded to the nearest thousands, except otherwise indicated.

The currency of the primary economic environment of the Authority (that is, functional currency) is the Nigerian Naira.

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The group's presentation currency is the Naira.

**(b) Foreign currency transactions and balances**

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges. Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within 'finance income or costs'. All other foreign exchange gains and losses are presented in the income statement within 'net exchange gains'.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortised cost are recognised in profit or loss, and other changes in carrying amount are recognised in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss. Translation differences on non-monetary financial assets measured at fair value, such as equities classified as available for sale, are included in other comprehensive income.

## Notes to the financial statements

### (c) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- a) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- b) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- c) all resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

### 3.4 Changes in accounting policy

There were no changes in the accounting policies of the Authority during the period.

### (a) New standards, amendments and interpretations adopted by the Group

There were no new standards adopted by the Group for the financial period beginning on or after 1 January 2017.

### (b) New standards, amendments and interpretations not yet adopted

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 January 2015, and have not been applied in preparing these consolidated and separate financial statements. None of these is expected to have a significant effect on the consolidated and separate financial statements of the Group, except the following set out below:

IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through OCI and fair value through P&L. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI not recycling.

There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one management actually use for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39. The standard is effective for accounting periods beginning on or after 1 January 2018. Early adoption is permitted. The Group is yet to assess IFRS 9's full impact. The Group intends to adopt this standard on 1 January 2018.

IFRS 15, 'Revenue from contracts with customers' deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18 'Revenue' and IAS 11 'Construction contracts' and related interpretations. The standard is effective for annual periods beginning on or after 1 January 2018 and earlier application is permitted. The Group is assessing the impact of IFRS 15. The Group intends to adopt this standard on 1 January 2018.

IFRS 16, 'Leases' requires lessees in a finance lease to recognise a right to use an asset and a corresponding liability. The standard is effective for annual periods beginning on or after 1 January 2019 and earlier application is permitted. The Group is assessing the impact of IFRS 16. The Group intends to adopt this standard on 1 January 2019.

There are no other IFRSs or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Group.

### 4 Significant accounting policies

The accounting policies set out below were adopted by the Group in the presentation of these financial statements.

#### 4.1 Consolidation

##### (a) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable intangible assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated. When necessary, amounts reported by subsidiaries have been adjusted to conform with the Group's accounting policies.

Notes to the financial statements

---

**(b) Change in ownership interest subsidiaries without loss of control**

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to noncontrolling interests are also recorded in equity.

**(c) Disposal of subsidiaries**

When the Group ceases to have control over any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

**(d) Associates**

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The Group's investment in associates includes goodwill identified on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

The Group's share of post-acquisition profit or loss is recognised in the income statement, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/(loss) of associates' in the income statement.

Profits and losses resulting from upstream and downstream transactions between the Group and its associate are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group. Dilution gains and losses arising in investments in associates are recognised in the income statement.

**4.2 Interest income and interest**

Interest income and expense, including interest income from non-derivative financial assets at fair value through profit or loss, are recognised in profit or loss using the effective interest rate method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability.

When calculating the effective interest rate, the Authority estimates future cash flows considering all contractual terms of the financial instrument, but not future credit losses. The calculation of the effective interest rate includes all fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

**4.3 Investment income**

Investment income consists of dividends, realised gains and losses on disposal of securities. A gain or loss on investments or securities is only realised on disposal or transfer, and is the difference between the proceeds received, net of transaction costs, and its original cost or amortised cost, as appropriate.

**4.4 Transaction costs**

All financial instruments are measured initially at their fair value plus transaction costs, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss where transaction costs are expensed in the income statement. They include fees and commissions paid to agents, custodians and advisers.

**4.5 Net gain from financial instruments at fair value through profit or loss**

Net gain from financial instruments at fair value through profit or loss includes all realised and unrealised fair value changes and foreign exchange differences, but excludes interest and dividend income, and dividend expense on short positions.

**4.6 Income tax expense**

The NSIA Act exempts the Authority from the provisions of any and all taxes, fees, imports or similar fiscal laws or regulations of the Federal Government, State Government, Federal Capital Territory, Local Government and Area councils of the Federal Republic of Nigeria. The Authority is however mandated to pay tax on behalf of its employees and suppliers.

Dividend and interest income received by the Authority may be subject to withholding tax imposed in the country of origin. Thus the investment income accruing to the Authority is gross of such taxes and the related withholding tax expense is recorded as such in the income statement.

Notes to the financial statements

---

**4.7 Financial assets and financial liabilities**

**4.7.1 Recognition and initial measurement**

All financial instruments are initially recognized at fair value at the trade date, which includes transaction costs for financial instruments not classified as fair value through profit or loss. Financial instruments are derecognized when the rights to receive cash flows from the financial instruments have expired or where the Authority has transferred substantially all risks and rewards of ownership.

**4.7.2 Classification**

The Authority has adopted the following classifications for financial assets and financial liabilities:

**Financial assets:**

- loans and receivables;
- held to maturity;
- available-for-sale;
- or fair value through profit or loss and within the category as:
  - held for trading; or
  - designated at fair value through profit or loss

**Financial liabilities:**

Financial liabilities are measured at amortised cost, or fair value through profit or loss.

**4.7.3 Subsequent measurement**

Subsequent to initial measurement, financial instruments are measured either at fair value or amortised cost, depending on their classification.

**Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those classified by the Authority as fair value through profit or loss or available-for-sale. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment losses. Transaction costs that are integral to the effective rate are capitalised to the value of the loan and amortised through interest income as part of the effective interest rate. All of the Authority's advances are included in the loans and receivables category.

**Held-to-maturity**

Held-to-maturity investments are non-derivative financial assets with fixed determinable payments and fixed maturities that management has both the positive intent and ability to hold to maturity, and which are not designated as fair value through profit or loss or as available for sale. Where the Authority is to sell more than an insignificant amount of held-to-maturity assets, the entire category would be tainted and reclassified as available-for-sale assets and the difference between amortised cost and fair value will be accounted for in other comprehensive income. Held-to-maturity investments are carried at amortised cost, using the effective interest method, less any provisions for impairment.

**Available-for-sale**

Financial assets classified by the Authority as available-for-sale financial assets are generally those that are not designated as another category of financial assets, or strategic capital investments held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices. Available-for-sale financial assets are subsequently carried at fair value. Unrealised gains and losses arising from changes in the fair value of available-for-sale financial assets are recognised directly in fair value reserve in other comprehensive income until the financial asset is derecognised or impaired. When available-for-sale financial assets are disposed of, the fair value adjustments accumulated in other comprehensive income are recognised in profit or loss. Interest income, calculated using the effective interest method, is recognised in profit or loss. Dividends received on available-for-sale financial instruments are recognised in profit or loss when the Authority's right to receive payment has been established.

**Financial assets at fair value through profit or loss**

This category has two sub-categories: financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified as held-for-trading if acquired principally for the purpose of selling in the short term. Derivatives are also categorised as held-for-trading unless they are designated as hedges.

Financial assets may be designated at fair value through profit or loss when:

- The designation eliminates or significantly reduces measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities on different basis; or
  - A group of financial assets is managed and its performance evaluated on a fair value basis.
- Subsequent to initial recognition, the fair values are remeasured at each reporting date.

**Financial liabilities**

The Authority classifies its financial liabilities as measured at amortised cost.

**4.7.4 Derecognition**

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the authority neither transfers nor retains substantially all the risks and rewards of ownership and does not retain control of the financial asset. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the authority is recognised as a separate asset or liability in the statement of financial position. On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised), and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss.

The Authority derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

**4.7.5 Amortised cost measurement**

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

Notes to the financial statements

4.7.6 Fair value measurement

Fair value is the price that will be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When available, the authority measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily and regularly available and represent actual and regularly occurring market transactions on an arm's length basis. If a market for a financial instrument is not active, the authority establishes fair value using a valuation technique. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, discounted cash flow analyses and option pricing models.

The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the authority, incorporates all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The authority calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price – i.e. the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different from its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognised in profit or loss on initial recognition of the instrument. In other cases the difference is not recognised in profit or loss immediately but is recognised over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred or sold, or the fair value becomes observable.

Subsequent to initial recognition, the fair values of financial instruments are based on quoted market prices or dealer price quotations for financial instruments traded in active markets. If the market for a financial asset is not active or the instrument is unlisted, the fair value is determined by using applicable valuation techniques. These include the use of recent arm's length transactions, discounted cash flow analyses, pricing models and valuation techniques commonly used by market participants.

Where discounted cash flow analyses are used, estimated cash flows are based on management's best estimates and the discount rate is a market-related rate at the reporting date from a financial asset with similar terms and conditions. Where pricing models are used, inputs are based on observable market indicators at the reporting date and profits or losses are only recognised to the extent that they relate to changes in factors that market participants will consider in setting a price.

4.7.7 Determination of fair values

A number of the Authority's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

4.7.8 Investment in equity and debt

The fair value of equity and debt securities is determined by reference to their quoted closing bid price at the reporting date. The fair value of held-to-maturity investments (which are the Federal Government of Nigeria Treasury bills) is determined for disclosure purposes only and are determined by reference to the quoted closing bid price at the reporting date.

4.7.9 Investment in private equity funds

The fair value of the investments held in one of the Group's subsidiaries are recognised at fair value determined using the net asset valuation method. This is done by obtaining

- i. the valuation of the Investee Fund's underlying investments;
- ii. the value date of the net asset value (NAV) provided;
- iii. cash flows (calls/distributions) since the latest value date; and
- iv. the basis of accounting and, in instances where the basis of accounting is other than fair value, fair valuation information provided by the Investee Fund's General Partner. If necessary, adjustments to the NAV are made to the various Investee Funds to obtain the best estimate of fair value.

4.7.10 Receivables

The fair value of short term receivables is measured at its carrying amount. Where the receivables are material; it is estimated at the present value of future cash flows, discounted at the market rate of return at the reporting date.

4.8 Impairment of financial assets

Financial assets carried at amortised cost

At each end of the reporting date, the Authority assesses whether there is objective evidence that a financial asset or portfolio of financial assets is impaired. A financial asset or portfolio of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or portfolio of financial assets that can be reliably estimated. Some objective evidence that a financial asset or portfolio of assets is impaired includes observable data that comes to the attention of the Authority on the following events:

Significant financial difficulty of the issuer or debtor; are expected to be useful for more than one period;

- A breach of contract, such as a default or delinquency in payments;
- It becomes probable that the issuer or debtor will enter bankruptcy or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial; or
- Observable data indicating that there is a measurable decrease in the estimated future cash flow from a portfolio/group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio/group.

The Authority first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant. If the Authority determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a portfolio of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Financial assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

Notes to the financial statements

**4.8 Impairment of financial assets**

If there is objective evidence that an impairment loss has been incurred on loans and receivables the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement. As a practical expedient, the Authority may measure impairment on the basis of an instrument's fair value using an observable market price.

If in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as improved credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the income.

**4.8.1 Identification and measurement of impairment**

At each reporting date the Authority assesses whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. A financial asset or a group of financial assets is (are) impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset(s), and that the loss event has an impact on the future cash flows of the asset(s) that can be estimated reliably.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the asset's original effective interest rate. Impairment losses are recognised in profit or loss and reflected in an allowance account against loans and receivables. Interest on impaired assets continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

**4.9 Impairment of non-financial assets**

The carrying amounts of the Authority's non-financial assets other than investment property and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows, which are largely independent from other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. Reversals of impairment losses are recognised in profit or loss.

**4.10 Cash and cash equivalents**

Cash and cash equivalents comprise fixed deposits with banks, and highly liquid financial instruments with original maturities of less than three months from the acquisition date, which are subject to insignificant risk of changes in their fair value, and are used by the Authority in the management of its short-term commitments.

Cash and cash equivalents are carried at amortised cost in the statement of financial position.

**4.11 Property and equipment**

**4.11.1 Initial recognition**

All items of property and equipment are initially recognised at cost. Cost includes the value of consideration exchanged, or fair value in the case of donated or subsidised assets, and those costs directly attributable to bringing the item to working condition for its intended use.

The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of equipment.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

**4.11.2 Subsequent costs**

The cost of replacing part of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Authority and its cost can be measured reliably. The carrying amount of the replaced part is derecognised.

The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

**4.11.3 Depreciation**

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property and equipment since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives. Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

The estimated useful lives for the current and comparative period are as follows:

Assets	Annual depreciation rate
Leasehold improvements over the shorter of the useful life of item or lease period	
Leasehold land	Over the lease period
Buildings	40 years
Computer equipment	3-3 years
Furniture and fittings	5 years
Office equipment	4 years
Motor vehicles	4 years

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

Notes to the financial statements

---

**4.11.4 Derecognition**

An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period the asset is derecognised.

**4.12 Intangible assets - software**

Software acquired by the Authority is stated at cost less accumulated amortisation and accumulated impairment losses. Software is recognized if it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and the cost of the software can be measured reliably. Expenditure that forms part of the cost of software that meets the recognition criteria are capitalized as part of the software. Software is accounted for using the cost model. After initial recognition, the software is carried at cost less accumulated amortization and any accumulated impairment losses.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful life of 3 years, from the date that it is available for use. The amortisation method and useful life of software are reassessed at each financial year end and adjusted if appropriate.

**4.13 Trade receivables**

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

**4.14 Inventory**

Inventories are valued at the lower of cost and net realisable value. The cost of inventories includes expenditures incurred in acquiring the inventories, production or conversion costs. In the case of manufactured inventory and work in progress, cost includes an appropriate share of production overheads based on normal activity level.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling

**4.15 Trade payables**

Trade payables are obligations that have been acquired in the ordinary course of business. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as noncurrent liabilities. Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

**4.16 Contingencies**

**4.16.1 Contingent assets**

Contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

A contingent asset is disclosed when an inflow of economic benefit is probable. When the realisation of income is virtually certain, then the related asset is not a contingent and its recognition is appropriate.

Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements.

**4.16.2 Contingent liabilities**

Contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.

Contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefit is remote. A provision for the part of the obligation for which an outflow of resources embodying economic benefits is probable is recognised, except in the extremely rare circumstances where no reliable estimate can be made. Contingent liabilities are assessed continually to determine whether an outflow of economic benefit has become probable.

**4.17 Employee benefits**

**4.17.1 Post employment benefits**

**Defined contribution plans**

Obligations for contributions to defined contribution plans are recognised as an expense in profit or loss when they are due.

**Pension Scheme**

The Authority operates a funded defined contribution retirement benefit scheme for its employees under the provisions of the Pension Reform Act 2014. The employee and the employer contributions are 8% and 10% respectively each of the qualifying employee's salary.

Obligations for contributions to defined contribution plans is recognised as an employee benefit expense in profit or loss in the period when the employees have rendered service entitling them to the contributions.

Contributions to a defined contribution plan that is due more than 12 months after the end of the period in which the employees render the service are discounted to their present value at the reporting date.

**4.17.2 Short term benefits**

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A provision is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Authority has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

**4.18 Capital commitments**

The term 'commitments' is not defined in any of the standards but may be referred to as the intention to commit to an outflow from the Group of resources embodying economic benefits.

Generally, a commitment arises when a decision is made to incur a liability in the form of a purchase contract (or similar documentation). Such a contractual commitment would be accompanied by, but not limited to, actions taken to determine the amount of the eventual resource outflow or a reliable estimate e.g. a quote, and conditions to be satisfied to establish an obligation e.g. delivery schedules.

These preconditions ensure that the information relating to commitments is relevant and capable of reliable measurement. The Group may enter into a contract on or before the reporting date for expenditure over subsequent accounting periods e.g. a contract for construction of infrastructure assets, the purchase of major items of plant and equipment or significant consultancy contracts. In these events, a commitment exists at the reporting date as the Group has contracted for expenditure but work has not commenced and no payments have been made.

Notes to the financial statements

---

**5 Critical accounting estimates and judgments**

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, incomes and expenses.

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, and in any future periods affected. Management discusses with the Board of Directors the development, selection and disclosure of the Authority's critical accounting policies and estimates, and the application of these policies and estimates. These disclosures supplement the commentary on financial risk management (see note 6).

**5.1 Critical accounting judgments in applying the Authority's accounting policies**

Critical accounting judgements made in applying the Authority's accounting policies include:

**5.1.1 Valuation of financial instruments**

The Authority's accounting policy on fair value measurements is discussed under Note 4. The Authority measures fair values using the following fair value hierarchy that reflects the nature and process used in making the measurements:

Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.

Level 2: Valuation techniques based on observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Valuation techniques using inputs that are not based on observable market data. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

**5.1.2 Financial assets and liabilities classification**

The Authority's accounting policies provide scope for assets and liabilities to be designated on inception into different accounting categories in certain circumstances: Details of the Authority's classification of financial assets and liabilities are given in Note 4.7.

**5.1.3 Impairment of available-for-sale equity**

The Group follows the guidance of IAS 39 Financial instruments: recognition and measurement to determine when an available-for-sale equity investment is impaired. This determination requires significant judgment. In making this judgment, the Group evaluates, among other factors, the duration and extent to which the fair value of an investment is less than its cost; and the financial health of and short-term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flow. There has been no impairment loss recognised in these financial statements.

**5.1.4 Fair value of investment classified as available-for-sale**

The fair values of quoted available-for-sale investments are determined by reference to prices quoted in an active market. For available for sale equity investments which are unquoted, the Authority carries these investments at cost due to unavailability of inputs to determine their fair values.

**5.1.5 Fair value of private equity investments**

The fair values of the private equity investments held by one of the Group's subsidiaries has been determined at the reporting date using the net asset valuation method. This takes into account the net asset values as obtained from the different private equity investee funds' most recent available financial information, considering contributions and distributions between the last net asset valuation date and the reporting period. These private equity investments are unquoted and comparable market information was not available as at the end of the reporting period. Determining the fair values based on this valuation approach assumes that the investment will be realised at the reporting date at these values. The sensitivity of the fair values to changes in the assumptions made is disclosed in Note 6.

**6 Financial risk management**

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

**6.1 Approach to risk management**

With a global outlook, the Group's strategy for managing risks is to understand risk within the invested universe and the externalities that can affect this, with the aim of monitoring, controlling and mitigating against undesired events.

The Group has adopted, wherever possible, recommended best practice in the identification, evaluation and cost effective control of risks to ensure, as far as possible, that they are eliminated or reduced to a level that is acceptable to the Authority. The Group's Risk Framework seeks to explain the Authority's underlying approach to risk management, documents the roles and responsibilities of the Board of Directors, Risk Management department and other key parties. It also outlines key aspects of the risk management process, and identifies the main reporting procedures.

**Nigeria Sovereign Investment Authority**  
**Unaudited consolidated and separate financial statements**  
**For the 6 months period ended 30 June 2017**

**Notes to the financial statements**

**6.2 Credit risk**

Credit risk is the risk that counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Group, resulting in a financial loss to the Group. It arises principally from debt securities held, trade receivables and advances, and also from cash and cash equivalents.

**6.2.1 Management of credit risk**

The Authority's policy over credit risk is to minimise its exposure to counterparties with perceived higher risk of default by dealing only with counterparties meeting credit standards, hence the Authority only deals with counterparties that meet set credit ratings.

**6.2.2 Exposure to credit risk**

The carrying amount of financial assets represents the maximum credit exposure per credit rating.

As at 30 June 2017, all financial assets are neither past due nor impaired. The credit quality of these financial assets are disclosed in the table below:

**For the 6 months period ended 30 June 2017**

**Notes to the financial statements**

**6.3 Liquidity risk**

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations arising from its financial liabilities that are settled by delivering cash or another financial asset, or that such obligations will have to be settled in a manner disadvantageous to the Group.

**6.3.1 Management of liquidity risk**

The Group's approach to managing liquidity is to have sufficient funds to meet its liabilities, as and when due, without incurring undue losses or risking damage to the Group's reputation. The Group manages its liquidity risk by maintaining cash levels to fund short term operating expenses.

The table below shows the Group's current cash levels:

	Group 30 June 2017 N '000	Group 31 December 2016 N '000	Authority 30 June 2017 N '000	Authority 31 December 2016 N '000

Notes to the financial statements

**6.4 Market risk**

Market risk is the risk of loss from unfavorable changes in the fair values of financial instruments caused by adverse moves in market variables, such as foreign exchange rates, interest rates, equity prices, commodity prices, credit spreads and implied volatilities of the market rates. Market risk losses could result in a loss of earning and/or capital to the Group. The Group is exposed to market risk through its proprietary investments and can experience capital erosion from its own direct investments in the market.

With regards to investments in certain asset classes, the Group's potential exposure can be categorised into two; namely, traditional investments and alternative investments. Traditional investments include cash, listed equity and fixed income instruments. Alternative investments are the real estate assets, private equity, hedge funds, unquoted securities and equities, hospitality, and are generally less liquid than traditional investments. Currently, the asset classes being referred to as alternative investments are the real estate assets, private equity, hospitality and infrastructure projects.

The Group's Market risk Framework includes:

- \* Market risk - comprising equity, interest rate, interest basis and currency risks;
- \* Valuation risk - which derives from the valuation methodology chosen for unlisted assets. A critical associated risk is that which relates to the valuation model. The Group has exposure to valuation risk through its investments in real estate assets, private equity investments as well as other alternative instruments and project development.

The Group manages market risk by actively controlling positions taken by investment managers in accordance with the investment strategy for each fund. The investment strategy outlines permissible asset classes, asset allocation limits and other position limits according to the portfolio risk appetite and risk profile. Exceptions are escalated and investment managers are expected to provide a plan of action that would bring portfolios within limits.

The identification, measurement and management of market risk is categorised as follows:

**6.4.1 Trading assets/Financial assets**

Trading assets are carried at fair value using publicly available market rates for traded securities. Positions are monitored regularly and performance measured to relevant benchmarks.

**6.4.2 Non-trading assets/ Non-financial assets**

Key performance measures are set and a robust monitoring and reporting framework is put in place to monitor performance of the Authority's investment in alternative and unlisted securities.

**6.4.3 Foreign exchange risk**

Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the Group's functional currency.

The Group has an investment in a foreign operation, whose net assets are exposed to foreign currency translation risk as a result of the translation of its financial statements from the operation's functional currency to the Group's presentation currency. Non-monetary financial assets are not exposed to foreign exchange risk in accordance with the standards. Currency exposure arising from the net assets of the Group's foreign subsidiary is managed primarily through cash and cash equivalents denominated in the relevant foreign currencies.

The tables below shows the sensitivity of the Group's total comprehensive income to appreciation or depreciation of the naira in relation to other currencies.

**Concentration of foreign currency exposure**

**Notes to the financial statements**

**6.4.4 Interest rate risk**

Interest rate risk is the risk of loss to net interest income (NII) arising from changes in market interest rates on rate sensitive assets and liabilities.

**Net interest income sensitivity**

There are two types of scenarios that give rise to interest rate risk. These are where the Group holds variable rate instruments susceptible to cash flow interest rate risk due to a change in market interest rates or the Group holds debts instruments measured at fair value which will be exposed to fair value interest rate risk. The Group holds debts instruments measured at fair value which are exposed to fair value interest rate risk. The table below shows the impact of interest rate changes (increase/decrease) on the Authority's fixed interest financial assets carried at fair value and the effect on other comprehensive income.

	<b>Group 30 June 2017 N '000</b>	<b>Group 31 December 2016 N '000</b>	<b>Authority 30 June 2017 N '000</b>	<b>Authority 31 December 2016 N '000</b>

**Nigeria Sovereign Investment Authority**  
**Unaudited consolidated and separate financial statements**  
**For the 6 months period ended 30 June 2017**

**Notes to the financial statements**

**6.4.5 Equities securities price risk**

The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated statement of financial position as available for-sale. The Group is not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.

The table below summarises the impact of increases/ decreases on the Group's other comprehensive income and equity. The analysis is based on the assumption that the equity prices had increased/decreased by 5% with all other variables held constant:

	<b>Group 30 June 2017 N '000</b>	<b>Group 31 December 2016 N '000</b>	<b>Authority 30 June 2017 N '000</b>	<b>Authority 31 December 2016 N '000</b>
Available for sale equities	1,502,801	1,529,839	635,078	745,343
	(1,502,801)	(1,529,839)	(635,078)	(745,343)

Other comprehensive income would increase/(decrease) as a result of gains/(losses) on equity securities classified as available for sale by the amounts shown above.

**7 Fair value hierarchy**

The Group classifies financial instruments measured at fair value in the investment portfolio according to the following hierarchy:

<b>Level</b>	<b>Fair value input description</b>	<b>Financial instruments</b>
Level 1	Quoted prices (unadjusted) from active markets	Quoted instruments
Level 2	Inputs other than quoted prices included in Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices)	Equity instruments quoted in over-the-counter (OTC) markets
Level 3	Inputs that are not based on observable market data (that is, unobservable inputs)	Unquoted equity instruments and debt instruments

Unquoted equity instruments and debt instruments are measured in accordance with the International Private Equity and Venture Capital valuation guidelines with reference to the most appropriate information available at the time of measurement.

The following tables analyse within the fair value hierarchy the Authority's financial assets (by class) measured at fair value at 31 December 2016. All fair value measurements disclosed are recurring fair value measurements.

*(a) Financial instruments in level 1*

The fair value of financial instruments traded in active markets is based on quoted market prices as at 30 June 2017. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1.

*(b) Financial instruments in level 2*

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. They include investments in equity securities that are not traded in an active market but for which a trading platform exists on which a price can be determined for which market participants would pay in order to purchase the asset as at the reporting date i.e.at the Over-the-Counter alternative markets.

These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2. If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. Specific valuation techniques used to value financial instruments include quoted market prices or dealer quotes for similar instruments.

*(c) Financial instruments in level 3*

Level 3 inputs are unobservable inputs that have been applied in valuing the respective asset or liability. The determination of what constitutes 'observable' requires significant judgment by the Authority. The Authority considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market. There were no transfers between levels during the year.

*Available-for-sale (Investments in hedge funds and private equity funds)*

Level 3 is comprised of investments in hedge funds and private equity funds held by the Authority that are not quoted in active markets. In determining the fair value of these investments, the Authority relies on the valuation as reported in the latest available financial statements and/ or capital account statements provided by the investment manager, unless the Authority is aware of reasons that such a valuation may not be the best approximation of fair value. In such cases, the Authority reserves the right to assign a fair value to such investments which differs from the one reported by the investment manager.

 For the 6 months period ended 30 June 2017

Notes to the financial statements

**8 Fund information**

The Authority has three Funds being the Stabilisation Fund (SF), Future Generations Fund (FGF) and Nigeria Infrastructure Fund (NIF). Each of the Funds is managed separately as they entail different investment objectives and strategies and contain investments in different products.

For each of the Funds, the management reviews the internal management report. The objective and principal investment products of the respective reportable segments are as follows:

Stabilisation Fund (SF)	To provide stabilisation support to the Federation in times of economic stress
Future Generation Fund (FGF)	To invest in a diversified portfolio of appropriate growth investments in order to provide future generation of Nigerians a solid savings base for such a time as the hydrocarbon reserves in Nigeria are exhausted
Nigeria Infrastructure Fund (NIF)	To invest in infrastructure projects in Nigeria that meet our targeted financial returns and contribute to the development of essential infrastructure in Nigeria

Information regarding the results of each Fund is included below. Performance is measured based on Fund as included in the internal management reports. Funds profitability is used to measure performance as the directors believe that such information is most relevant in evaluating the profitability of each fund.

14 Taxation

This represents the tax deducted at source on investment income due to the Group. These are taxes deducted on income made by the subsidiary incorporated outside Nigeria. The rates of these taxes vary and depends on the jurisdiction the income was made. The amounts paid represents the final tax liability on the income. Income accruing to the authority and wholly owned subsidiaries is exempt from all forms of taxes in line with the Nigeria Sovereign Investment Authority Act.

There has been no tax paid by the foreign subsidiary as at period under review.

The balance shows the fair value of the financial assets arising from the currency swap transactions with the Central Bank of Nigeria. The notional amount of 8305million represents the balance as at the end of the current period, which is the amount of the underlying assets and is the basis upon which the changes in the value were measured. The outstanding notional amount indicate the volume of transactions as at the period end and are indicative of neither the market risk nor the credit risk.

Fair value reserve	(78)	(247)
Currency translation differences	12	1,461
Closing balances	<u>5,019</u>	<u>4,623</u>

**24 Capital management**

The Authority is to maintain a strong capital base in order to retain the confidence of the Nigerian people and the market with a bid to sustain future developments for the business. Management monitors the return on capital by reviewing monthly performance returns from investment managers.

The management of the Authority seeks to maintain a balance between the higher return that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

The Authority monitors capital using a ratio of adjusted net debt to adjusted equity. For this purpose, adjusted net debt is defined as total liabilities, comprising payables to counterparties and other obligations, less cash and cash equivalents. Adjusted equity comprises all components of equity.

**Nigeria Sovereign Investment Authority**  
**Unaudited consolidated and separate financial statements**  
**For the 6 months period ended 30 June 2017**

**Notes to the financial statements**

The Authority's adjusted net debt to equity ratio at 30 June 2017 was as follows:

	<b>Group</b> <b>30 June</b> <b>2017</b> <b>N '000</b>	<b>Group</b> <b>31 December</b> <b>2016</b> <b>N '000</b>	<b>Authority</b> <b>30 June</b> <b>2017</b> <b>N '000</b>	<b>Authority</b> <b>31 December</b> <b>2016</b> <b>N '000</b>
Total liabilities	33,595,726	24,089,561	5,184,884	3,718,488
Less: cash and cash equivalents	57,178,396	148,267,906	32,289,999	141,076,852

<b>Net surplus to adjusted equity ratio</b>	<b>-6%</b>	<b>-31%</b>	<b>-7%</b>	<b>-35%</b>

**25 Related parties**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. NSIA is the ultimate parent of the Group. As disclosed in note 18, NMIC, KG Brussels LP, FGF Private Equities Co. Ltd, FGF Investments Ltd, FGF PE Beta Ltd, and NAIC are subsidiaries of the Authority and are therefore related parties. NMRC is an associate of the Authority and is also a related party. The Second Niger Bridge Company Ltd is a related party to NMIC and as a consequence, the Authority, NAIC-NPK is a subsidiary of NAIC and is also a related party.

The following are the transactions with related parties during the period:

Payables to related parties:

	<b>Group</b> <b>June</b> <b>2017</b> <b>N '000</b>	<b>Group</b> <b>31 December</b> <b>2016</b> <b>N '000</b>	<b>Authority</b> <b>June</b> <b>2017</b> <b>N '000</b>	<b>Authority</b> <b>31 December</b> <b>2016</b> <b>N '000</b>
Payable to the Federal Government in respect of the Second Niger Bridge	20,540,232	20,459,530	-	-
	<b>20,540,232</b>	<b>20,459,530</b>	<b>-</b>	<b>-</b>

Represents monies received from the Federal Government of Nigeria to finance the early works phase in respect of the Second Niger Bridge project.

**25.1 Compensation of key management personnel**

The Authority's key management personnel, and persons connected with them, are also considered to be related parties for disclosure purposes. The definition of key management includes close members of family of key personnel and any entity over which key management exercise control. The key management personnel have been identified as the executive management of the Authority. The executive management of the Authority did not hold any shares in the Authority during or as at the end of the period. The compensation paid or payable to key management for employee services is shown below:

Directors' remuneration and expenses:

	<b>30 June</b> <b>2017</b> <b>N '000</b>	<b>30 June</b> <b>2016</b> <b>N '000</b>
Executive compensation	518,220	253,081
Defined contribution plan	36,395	15,171
	<b>554,615</b>	<b>268,252</b>

**25.2 Transactions with subsidiaries**

The underlisted subsidiaries have the following payables due to the Authority as at the reporting date:

	<b>30 June 2017</b>	
	<b>Type of interests</b>	<b>Gross amount</b> <b>N'000</b>
NSIA Motorways Investment Company Limited	Subsidiary	64,906
KG Brussels L.P.	Subsidiary	38,326

Notes to the financial statements

27 Commitments

(a) Capital commitments

The Authority's unfunded commitments with private equity fund managers are as follows:

Capital commitments - US\$:

	Authority		Naira equivalent	
	30 June 2017	31 December 2016	Authority 30 June 2017	Authority 31 December 2016
	8 '000	8 '000	N '000	N '000
HealthCare Royalty Partners (HCRP)	8,774	14,398	9,679,580	4,384,168
Z Capital Partners	6,048	6,813	1,847,059	2,074,420
Fund for Agricultural Finance in Nigeria (FAFIN)	2,604	3,459	822,748	1,053,259
Hellas Investors	2,983	5,165	911,008	1,572,875
Actis Africa Real Estate Fund	8,191	8,705	2,501,531	2,650,573
Capital Alliance Private Equity Fund	5,352	5,352	1,634,501	1,629,545
Abraaj Growth Markets Health Fund L.P	3,567	-	1,089,457	-
<b>Total</b>	<b>37,609</b>	<b>43,892</b>	<b>11,485,884</b>	<b>13,364,841</b>

Capital commitments - Euro:

	Authority		Authority	
	30 June 2017	31 December 2016	30 June 2017	31 December 2016
	Euro '000	Euro '000	N '000	N '000
Xenon Private Equity	2,888	2,888	1,006,885.60	928,836.19

As disclosed above, the Authority has committed to provide capital to various collective investment vehicles. The total of these commitments at the statement of financial position date is US\$37.6 million and Euro 2.89 million (2016: US\$43.9 million and Euro 2.89 million). The Authority's commitment obligations, being capital calls, are set out in the various underlying subscription documents. Whilst the actual timing of the capital calls to be made by the managers of these vehicles is uncertain, as it is dependent on the managers sourcing suitable investment opportunities, the Authority has recorded the commitments as being current in accordance with the underlying legal documents. The Authority has appropriate liquidity planning in place to ensure a suitable allocation of resources will be available to cover these future commitments of capital.

(b) Operating Lease Commitments - Group Company as Lessee:

The Group leases its head office under non-cancellable operating lease agreements. The lease terms are between 1 and 5 years, and the majority of lease agreements are renewable at the end of the lease period at market rate. These lease payments are payments made in advance and thus no minimum lease payments are required to be shown.

28 Other fiduciary activities

The sums of USD\$200 million (N61.08 billion) and USD\$350 million (N106.89 billion) ("the Funds") were received from the Debt Management Office ("DMO") and Nigerian Bulk Electricity Company Plc. ("NBET") respectively under an Investment Management Agreement ("the Agreement"). NSIA acts as a manager of the Funds. The agreement provides for the Authority to invest the Funds in gas, power and other related projects. Consideration is payable to the Authority after certain milestones have been met and the customers' share of return has been paid. A total of USD\$100 million (N30.54 billion) was withdrawn from the DMO fund in order to fund the Second Niger Bridge Project and Lagos/Ibadan expressway project on the authority of the Federal Government. The fair value of the Managed Funds as at 30 June 2017 stood at USD\$370.34 million (N113.4 billion) and USD\$432.88 million (N40,581 billion) for NBET and DMO respectively (2016: USD\$490.71 million/N149,862 billion and 2016: USD\$ 173 million/N529 billion for NBET and DMO respectively) while nil income has been accrued by the Authority from the fiduciary agreement activities as of 30 June 2017.

A total sum of N11.39 billion have been received from the Federal Government Stabilization Account via the Office of the Accountant General of the Federation ("OAGF"). NSIA is to act as a manager to the fund with a mandate to invest the funds in line with the investment policies of the Stabilization Fund of the Authority. The fair value of the Fund as at 30 June 2017 was N12.66 billion.

The assets and liabilities of the Funds have been excluded from these financial statements as they are not assets and liabilities of the Authority
